Subject: New Sewage

Treatment Plant
02/06/2003
05:57 PM

Feb.6/2003

To Halton Regional Government and the Town of
Oakville,

There has been rushed action to build a new
sewage treatment plant in Oakville without public
input on:

- 1) Who should pay for it: the developers who will
mostly benefit from it or the present homeowners
- 2) The technology to be used: ie will it adequately
remove pollutants which favour algae growth in
the lake?
- 3) How will it affect the residents and businesses
located in proximity to the proposed location of
this plant?

Since none of these questions (and several
others) have been addressed in a meaningful manner,
it is incumbent on the municipal and regional
governments to extend the period allocated for public
input on the matter. Failure to do so would clearly
indicate a lack of concern for the democratic
process,
a key factor of which is public participation.

Regards,
Paul Musiol
